

### **Work Profile at HSTP**

Sonali's work focuses on a landscape analysis of governance and regulatory mechanisms in the Indian health sector encompassing all its key components. This includes a review of literature, cataloguing available laws, policy instruments and regulatory tools, key stakeholder interviews and expert consultations.

She supports synthesizing existing evidence in Health Systems Governance and Regulations in India and analysing gaps, challenges, and opportunities to identify HSTP's areas of intervention either at state or national level along with Health Systems Governance unit at HSTP.

**Major Research Interests:** Health Systems research with focus on Governance and Regulations, Health Informatics, Data Analysis and Visualisation tools.

### **Key Achievements:**

One among the 10 national winners of the 'INFOSYS fellowship' supported by INFOSYS Foundation & Public Health Foundation of India, Delhi, 2018

### **Education:**

- MPH: Indian Institute of Public Health - Delhi
- BDS: Government Dental College and Hospital - Patiala

### **Brief Bio**

Sonali is a dentist with Master of Public Health from Indian Institute of Public Health, Delhi. In last two years of working with non-profit organizations, she has worked both in research and operational elements of program. While working as Program Associate at Piramal Swasthya, Assam, she assisted in building up working relationships with senior Govt. officials both at the state and district levels especially in the MCH cell of NHM, Assam through her work in different aspects of Maternal and Child Health. She was also actively involved in development of district health factsheets for all states on key health indicators using NFHS 4 (2015-16) data for tribal population of India as member of Tribal Health Collaborative of Piramal Swasthya with International Institute for Population Sciences, Mumbai.
