

Dr. Sudheer Kumar Shukla
Specialist-Resource Planning for Health

Dr. Sudheer Kumar Shukla is a specialist in resource planning for health at HSTP. He has eight years of research experience in public health and financing. He holds a Ph.D. in Population Studies from Jawaharlal Nehru University, with a focus on health shocks and wellbeing among urban lower middle-income group. He has also worked as a research fellow at the Lancet Commission on Reimagining India & health system, where he co-authored a publication on estimating funds required for UHC within Indian states. He has contributed to various reports and projects on topics such as human development, health insurance, food security, and nutrition, supported by renowned organizations such as the World Bank, WHO, ICMR, and ICSSR. He has extensive consulting experience with organizations such as the Population Council, ADB, Institute for Human Development, and Institute of Economic Growth. In his current role at HSTP, he coordinates with authorities, analyses financial and public health data, projects resource requirements for the health sector budget, and plans and documents methodologies. He conducts rigorous reviews and develops comprehensive reports that provide valuable insights to stakeholders. He is passionate about improving the quality and equity of health care in India through evidence-based policy and practice.
