

Ruchi Verma
Specialist- Health Informatics

Ruchi brings a unique blend of expertise in healthcare management and information systems to her role as specialist in Health Informatics, in the Digital Health practice at Health System Transformation Platform. With a master's degree in computer science and in Disaster Mitigation, she has over a decade's experience working in leveraging technology and information systems for enhancing healthcare delivery in Indian rural settings. With a comprehensive understanding of both rural healthcare practices and technological solutions, she has successfully implemented and managed a range of health information systems.

Recognized for her expertise in MIS and healthcare management, she has made significant contributions to various healthcare programmes and initiatives like IDSP, CMIS-Avahan Project (BMGF), MCTS (now RCH) and HMIS that have streamlined workflows, enhanced decision-making processes, and improved data management.

Before joining HSTP, she worked at NIHFV as Senior Consultant (IT) HMIS (Health Management Information System) Unit under NRHM (National Rural Health Mission) providing support in Monitoring the HMIS and MCTS (Mother & Child tracking system) reporting system. Data analysis and devising new methods of training is her forte.

Her spell with the Ministry of Health and Family Welfare, FHI India, and the Department of Health & Family Welfare of Govt. of Gujarat in the capacity of M&E officer and data manager gave her a deep understanding of health Data of these important health initiatives.

She started her journey in the healthcare domain as a Tech. Asstt. M&E at WHO (Gujarat Office) post-Gujarat Earthquake and also served as web content manager in the WHO country Office.
